

Fig. S2 Differential accumulation of flavonoids metabolites during tender shoots development of P113. (a), (b), (c), (d), (e) and (f) represents the clustering heat map of flavonoids metabolites with differences among Bvs.A, Cvs.A, Dvs.A, Cvs.B, Dvs.B and Dvs.C groups respectively. A is the bud (P1), B is the first leaf (P2), C is the second leaf (P3) and D is the third leaf (P4).
