Mean scores of each attribute±Standard Deviation (SD); the different letters in the same column denote that the values were significantly different by use of the Duncan's multiple range test (n =30; 10 panelists with 3 replications). Levels of significance: *, significant ($P \leq 0.05$); **, highly significant ($P \leq 0.01$); ***, very highly significant ($P \leq 0.001$).
