

Table S6: Statistical analysis results of the effect of days after transplanting (DAT) on *Adansonia digitata* seedlings leaves fresh and dry biomasses.

Day after transplanting	Fresh Biomass (g/plant)	Dry Biomass (g/plant)
30	12.41c	4.51a
61	17.02b	NA
91	21.29a	5.02a
<i>Pvalue</i>	<2e-16	0.0634

Numbers with the same letters are not statistically different at $P = 0.05$.
