

Table.4 Weather indicators

Features	Type	Description
TemperatureF_2m	Numerical	Air temperature at 2 meters above the airport surface in degrees Fahrenheit ( °F )
RelativeHumidity_2m	Numerical	Measure the humidity level of the air at a height of 2 meters above the airport ground
AvgWindSpeed	Numerical	The speed at which air moves relative to the ground per unit of time
WindDirection	Numerical	Describe the direction of local winds at the airport
WeatherCode	Categorical	Identify various types of weather conditions at the airport
Rainfall	Numerical	Rainfall at the airport per hour (mm)
