

**Supplementary Figure S2.** Preliminary verification of the function of vvi-miR395 in *N. benthamiana*. (a) Expression levels of miR395, PRs genes in tobacco leaves that transiently overexpressing vvi-miR3951, transiently silencing vvi-miR3951. (b) Lesion symptoms and trypan blue staining on leaves of transiently overexpressing vvi-miR3951, transiently silencing vvi-miR3951 and empty vector. Scale bars correspond to 1 cm. \* $p < 0.05$ , \*\* $p < 0.01$ , \*\*\* $p < 0.005$ .
