

**Supplementary Fig S6. Photography and texture analysis of SCs-derived cultured meat.** (A) Pictures of peanut wire-drawing protein scaffold and scaffold with cells at indicated stages. Scale bar, 1 cm. (B) Texture of cultured meat at different stages of production. Mean  $\pm$  SD from at least three independent experiments. Significance was analyzed by one-way ANOVA. \*  $p < 0.05$ , \*\*  $p < 0.01$ , \*\*\*  $p < 0.001$ , \*\*\*\*  $p < 0.0001$ , compared between indicated groups.
