

Fig. S8 Area Under Curve (AUC) values of Receiver Operating Characteristic (ROC) curves for four time periods. (a) Present climate (AUC = 0.097). (b) LGM period (AUC = 0.978). (c) LIG period (AUC = 0.981). (d) Future 2070 (2061–2080) RCP 4.5 (AUC = 0.982). The higher the value, the better the accuracy of the model.
