

Supplementary Fig. S1

Characteristics of Qu-1 suspension cell line.(a). Qu-1 cells also exhibited almost 100% viability using Fluorescein diacetate (FDA) as a probe. Bar=20 μm ; (b). After 20 days cultured of Qu-1 and BY-2 cells in medium reached an absorbance of OD600. Asterisks indicate ** $P < 0.01$ (Student's t-test).
