

Fig. S4. FPKM values of *PpBBX4* (A), *PpCRYD* (B) and *PpCOP1* (C) genes of peel samples treated with red, green and blue light or under dark condition. R3, G3, B3 and D3 represent peel samples treated with 72h of red, green, blue light irradiation and 72h of treatment in dark. The error bars show \pm SE of three biological replicates.
