

Phylogenetic tree

Supplementary Figure 1. Phylogenetic tree comparing FT gene sequences from different species: *Malus domestica* (MdFT1), *Prunus persica* (PpFT), *Solanum lycopersicum* (SolFT), *Arabidopsis thaliana* (AtFT), *Citrus sinensis* (CiFT3), *Citrus australasica*, and *Citrus clementina* (CcFT3). Gene sequences were retrieved from the Phytozome v13 database. Sequence alignment and phylogenetic analyses were performed using MEGA11 software.
