

Table S4. ANOVA of the effects of different factors on seed germination rate.

Source of variation	Sum of squares	Degrees of freedom	Mean square	<i>F</i> -value	<i>p</i> -value
A: GA ₃ Concentration	112.34	2	56.17	24.98	< 0.001
B: Soaking Duration	156.67	2	78.34	34.81	< 0.001
C: Incubation Temperature	289.45	2	144.73	64.26	< 0.001
Error (within treatment)	40.44	18	2.25	-	-

$p < 0.05$ indicates significant difference, and $p < 0.01$ indicates extremely significant difference.
