

Supplementary Table S2. Parameters for the relationship between cumulative evapotranspiration and days without irrigation and between leaf water potential and days without irrigation for four zoysiagrass cultivars. Data are means \pm standard errors. Original data and curves are presented in Figure 1.

Parameters	Lobo	Zeon	Empire	Meyer
Cumulative evapotranspiration (Asymptote)				
Asymptote (Asym)	1571 \pm 58	1528 \pm 51	1566 \pm 53	1491 \pm 48
Response at x=0 (R_0)	69.5 \pm 9.3	98.5 \pm 9.5	81.9 \pm 9.6	56.9 \pm 9.4
Log Rate Constant (lrc)	-1.75 \pm 0.05	-1.54 \pm 0.04	-1.55 \pm 0.04	-1.55 \pm 0.04
Leaf water potential (Linear)				
Slope (β_1)	-0.97 \pm 0.08	-0.97 \pm 0.08	-0.96 \pm 0.08	-0.95 \pm 0.07
Intercept (β_0)	1.31 \pm 0.35	0.74 \pm 0.59	1.06 \pm 0.58	1.22 \pm 0.25
