

Supplementary Figure S2. Histograms of best linear unbiased predictions (BLUEs) for freeze tolerance traits in St. Augustinegrass Raleigh selfing population. Red triangles indicate the value for cultivar ‘Raleigh’. PGC = Percent green cover, UPGC = UAS-derived percentage green cover, FC = fall color, WI = winter injury, WK = winterkill. The 21, 22, and 23 after trait abbreviations indicate years 2021, 2022, and 2023, respectively.
