```
[E01 | Character-level example | instantiated from T02]
QUESTION: How should the character “道” be understood in Chinese cultural
discourse?
SLOTS: X: Character (subtype of Culture-loaded Word)
EVIDENCE PATH: Character → Explanation
```

```
[E02 | Sentence-level example | instantiated from T01]
QUESTION: From which cultural source does the sentence “爱民者强，不爱民者弱”
originate?
SLOTS: X: Sentence (subtype of Culture-loaded Word)
EVIDENCE PATH: Sentence → Source
```

Supplementary Figure S2: Subtype-specific instantiation examples. We provide two illustrative instantiations at finer granularity. These examples do not introduce new template types; they only show how the superclass slot “Culture-loaded Word” can be instantiated as different subtypes in actual dataset construction.
