

Supplementary Table S8. Quantitative evaluation of carvacrol and thymol inhibitory effects on *Colletotrichum fructicola* growth and lesion development using *in vitro* PDA plate assays.

| Samples | Concentration ($\mu\text{g mL}^{-1}$) | Colony diameter (mm) | Mycelial inhibition rate (%) |
|-----------|---|----------------------|------------------------------|
| Control | 0 | 61.3 | - |
| Carvacrol | 100 | 12.5 | 86.7 |
| Thymol | 100 | 30.7 | 54.4 |
