

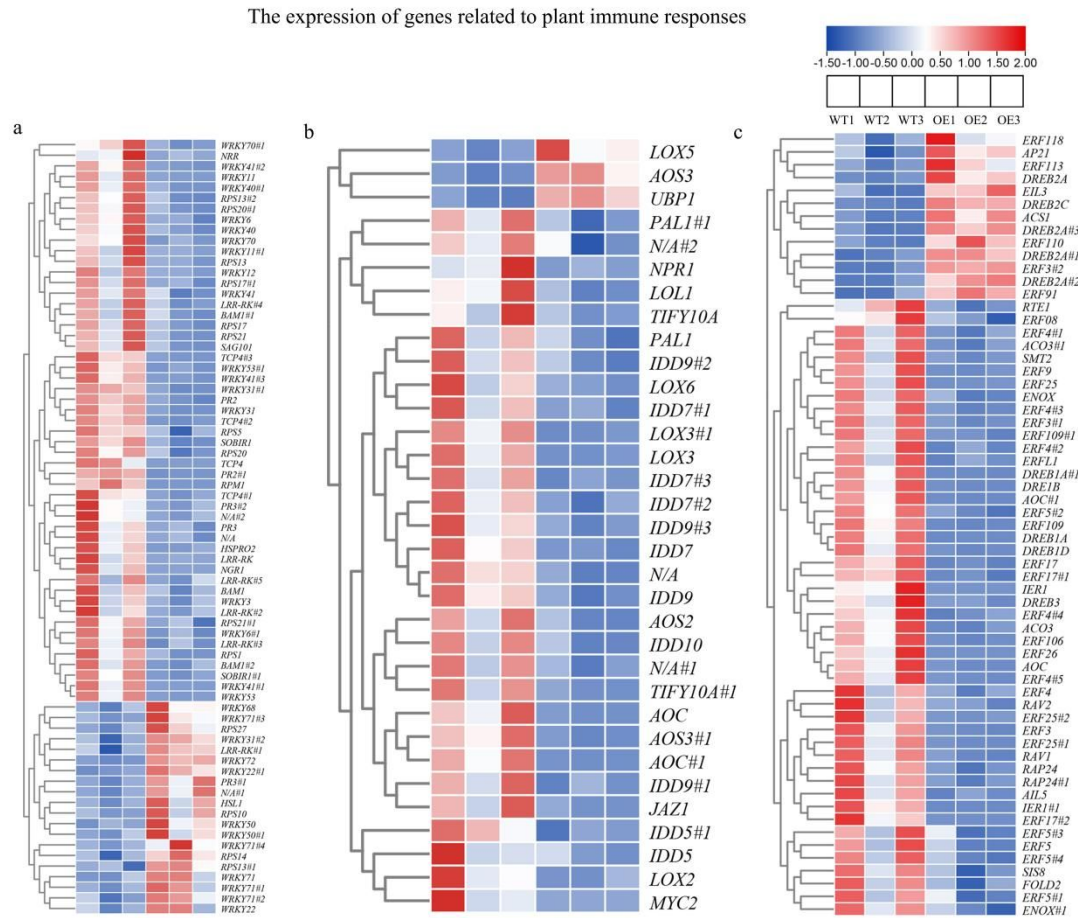

Fig. S9. Overexpression of *Flhbp1* in *F. lateritium* suppresses PTI/ETI immunity and SA, JA, and ET hormone pathways in *N. benthamiana*. The heatmap shows the expression of immune-related genes in *N. benthamiana* after infection with WT or *Flhbp1*^{OE} strains of *F. lateritium*. Color scale: blue, down-regulated; red, up-regulated.
