

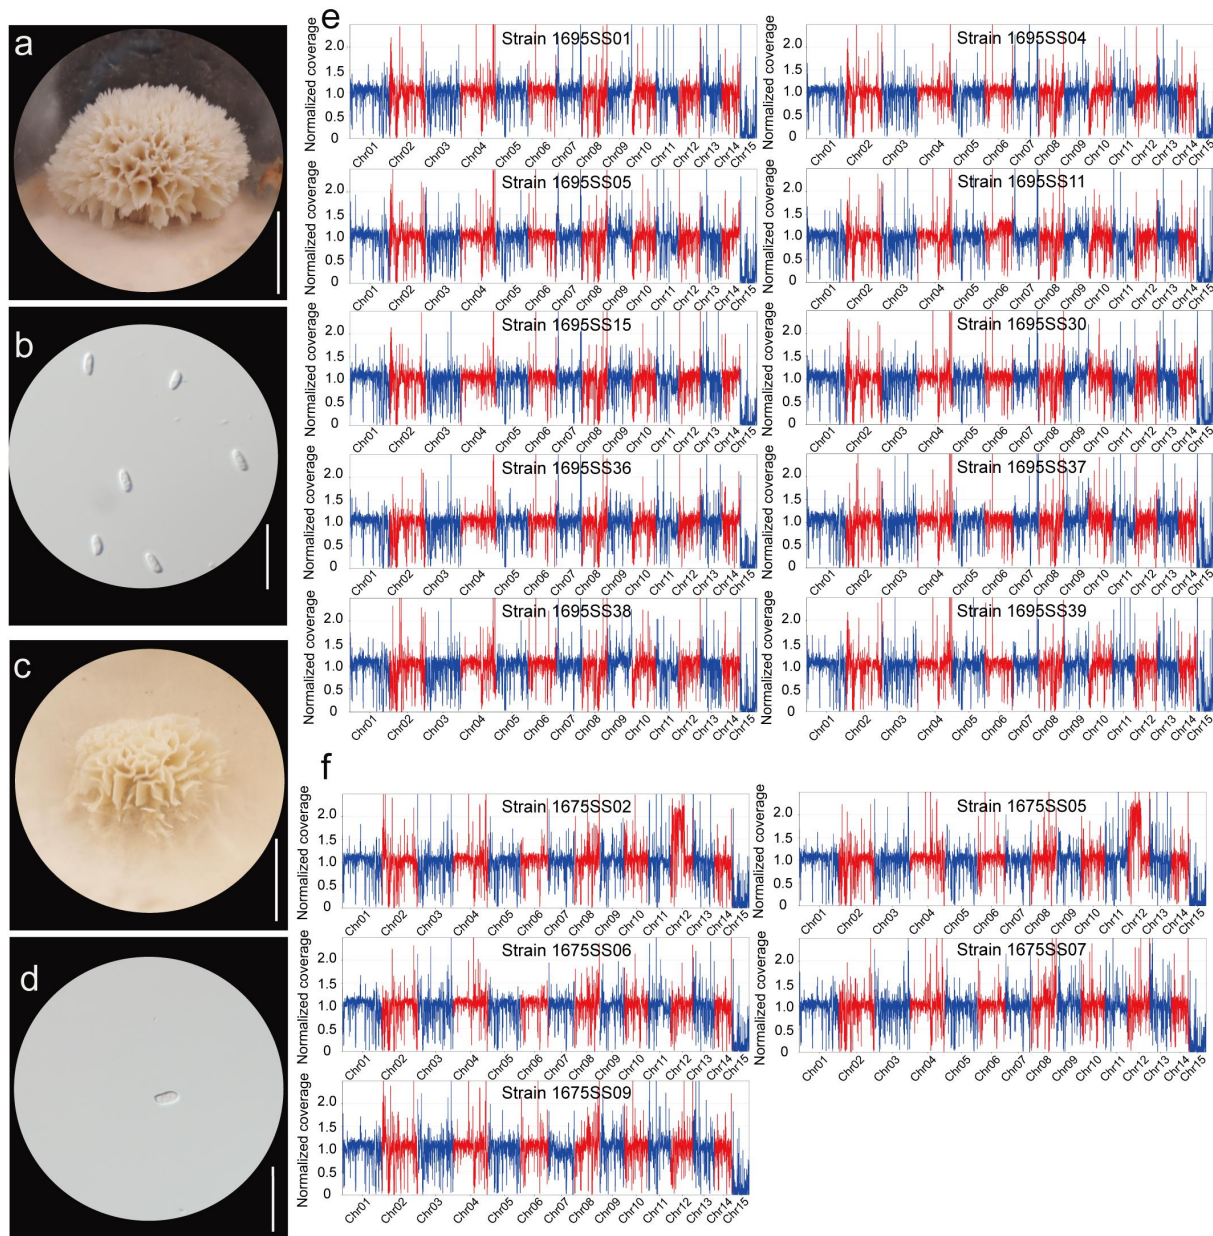

Figure S16. Fruiting bodies, basidiospores, and resequencing analysis of wild AC-absent strains 1675 and 1695. (a), (b), Fruiting body (a) and basidiospores (b) of strain 1695. (c), (d), Fruiting body (c) and basidiospores (d) of strain 1675. Bar = 1 cm (fruiting bodies) and 20 μ m (basidiospores). (e), (f), Normalized genomic coverage of sexual progeny derived from strain 1695 (e; n = 10) and strain 1675 (f; n = 5).
