

**Fig. S2 Schematic diagram of the bulblets formations position on scales.**

Each formation position corresponds to a lily variety. **(a)** 'Red Twin'; **(b)** 'Easy Whisper'; **(c)** 'Apricot Fudge'. All of them were cultured for 6 months under the culture conditions shown in 2.2. I: Bullets formed on the proximal base of the adaxial surface; II: Bullets formed on the distal base of the abaxial surface; III: Bullets formed on the site of damage areas.
