

**Fig. S5** Effects of pre-spraying with GR24 and TIS108 on gene expression of SL biosynthesis and signal transduction under HS. (a) *DcD27*. (b) *DcMAX1*. (c) *DcD14*. (d) *DcMAX2*. (e) *DcSMXL8*. Data shown as mean  $\pm$  SD, and different letters indicate significant differences ( $P < 0.05$ ).
