

Fig. S6. GSEA analysis of gene expression for cell proliferation (GO0051301) and cell division (GO0051726). A, B: GSEA enrichment map of cell proliferation with annotations in the transcriptome (ES = -0.43; NES = -1.71). GSEA enrichment map (A) of the enriched genes and annotation map (B) containing gene annotations. C, D: GSEA enrichment map of cell division with annotations in the transcriptome (ES = -0.47; NES = -1.65). GSEA enrichment map (C) of the enriched genes and annotation map (D) with gene annotations. ES, enrichment fraction; NES: normalized enrichment fraction.
