

Supplementary Figure 4. Pollen tube attraction efficiency of *npa1 npa2* mutant.

A. The pollen tube attraction efficiency at 24 HAP. Bar, 500 μ m. HAP, hours after pollination. White asterisks, targeted ovules. Red asterisks, twisting pollen tubes within the ovules. **B.** Statistics of **A.** $n = 375, 380, 411$ and 382 for each sample. Two-tailed Student's t -test. All data shown are the mean \pm s.e.m. Three independent biological experiments were repeated.
