

**Figure S14. RT-qPCR analysis of expressions of *BnLEC1* and *BnSnRK2;2* in 25 DAP seeds of *Brassica napus* with ABA treatment.** Three biological replicates were performed, and means  $\pm$  SE are shown. CK, control (without ABA treatment); 10  $\mu$ M, 50  $\mu$ M and 100  $\mu$ M, plants treated with different concentrations of abscisic acid (ABA) for 3 days (A). 0h, 0.5h, 1h, 3h, 6h, plants treated with ABA for different time.
