Fig. S3 *OsMADS4* mutant alleles

(a) Schematic diagram of the *OsMADS4* gene. Grey boxes represent 5'UTR and 3'UTR, black boxes represent exons, and thick black lines represent introns. The black arrowhead indicates the mutation target site, *Osmads4-1* and *Osmads4-2* contain a T deletion and a T insertion, respectively, in the *OsMADS4* coding sequence. (b) Sequencing results of the target site of wild type, *Osmads4-1* and *Osmads4-2*.
