

Figure S2 Differentially expressed genes (DEGs) with $P < 0.05$ between WT(Col0) and *GmJAZ8* over-expressing lines. A, overlapping DEGs between OE_6 and OE_28 at 24HAI. B, GO assay of up-regulated overlapping DEGs at 0HAI. C, GO assay of down-regulated overlapping DEGs at 24HAI. D, GO assay of up-regulated overlapping DEGs at 24HAI.
