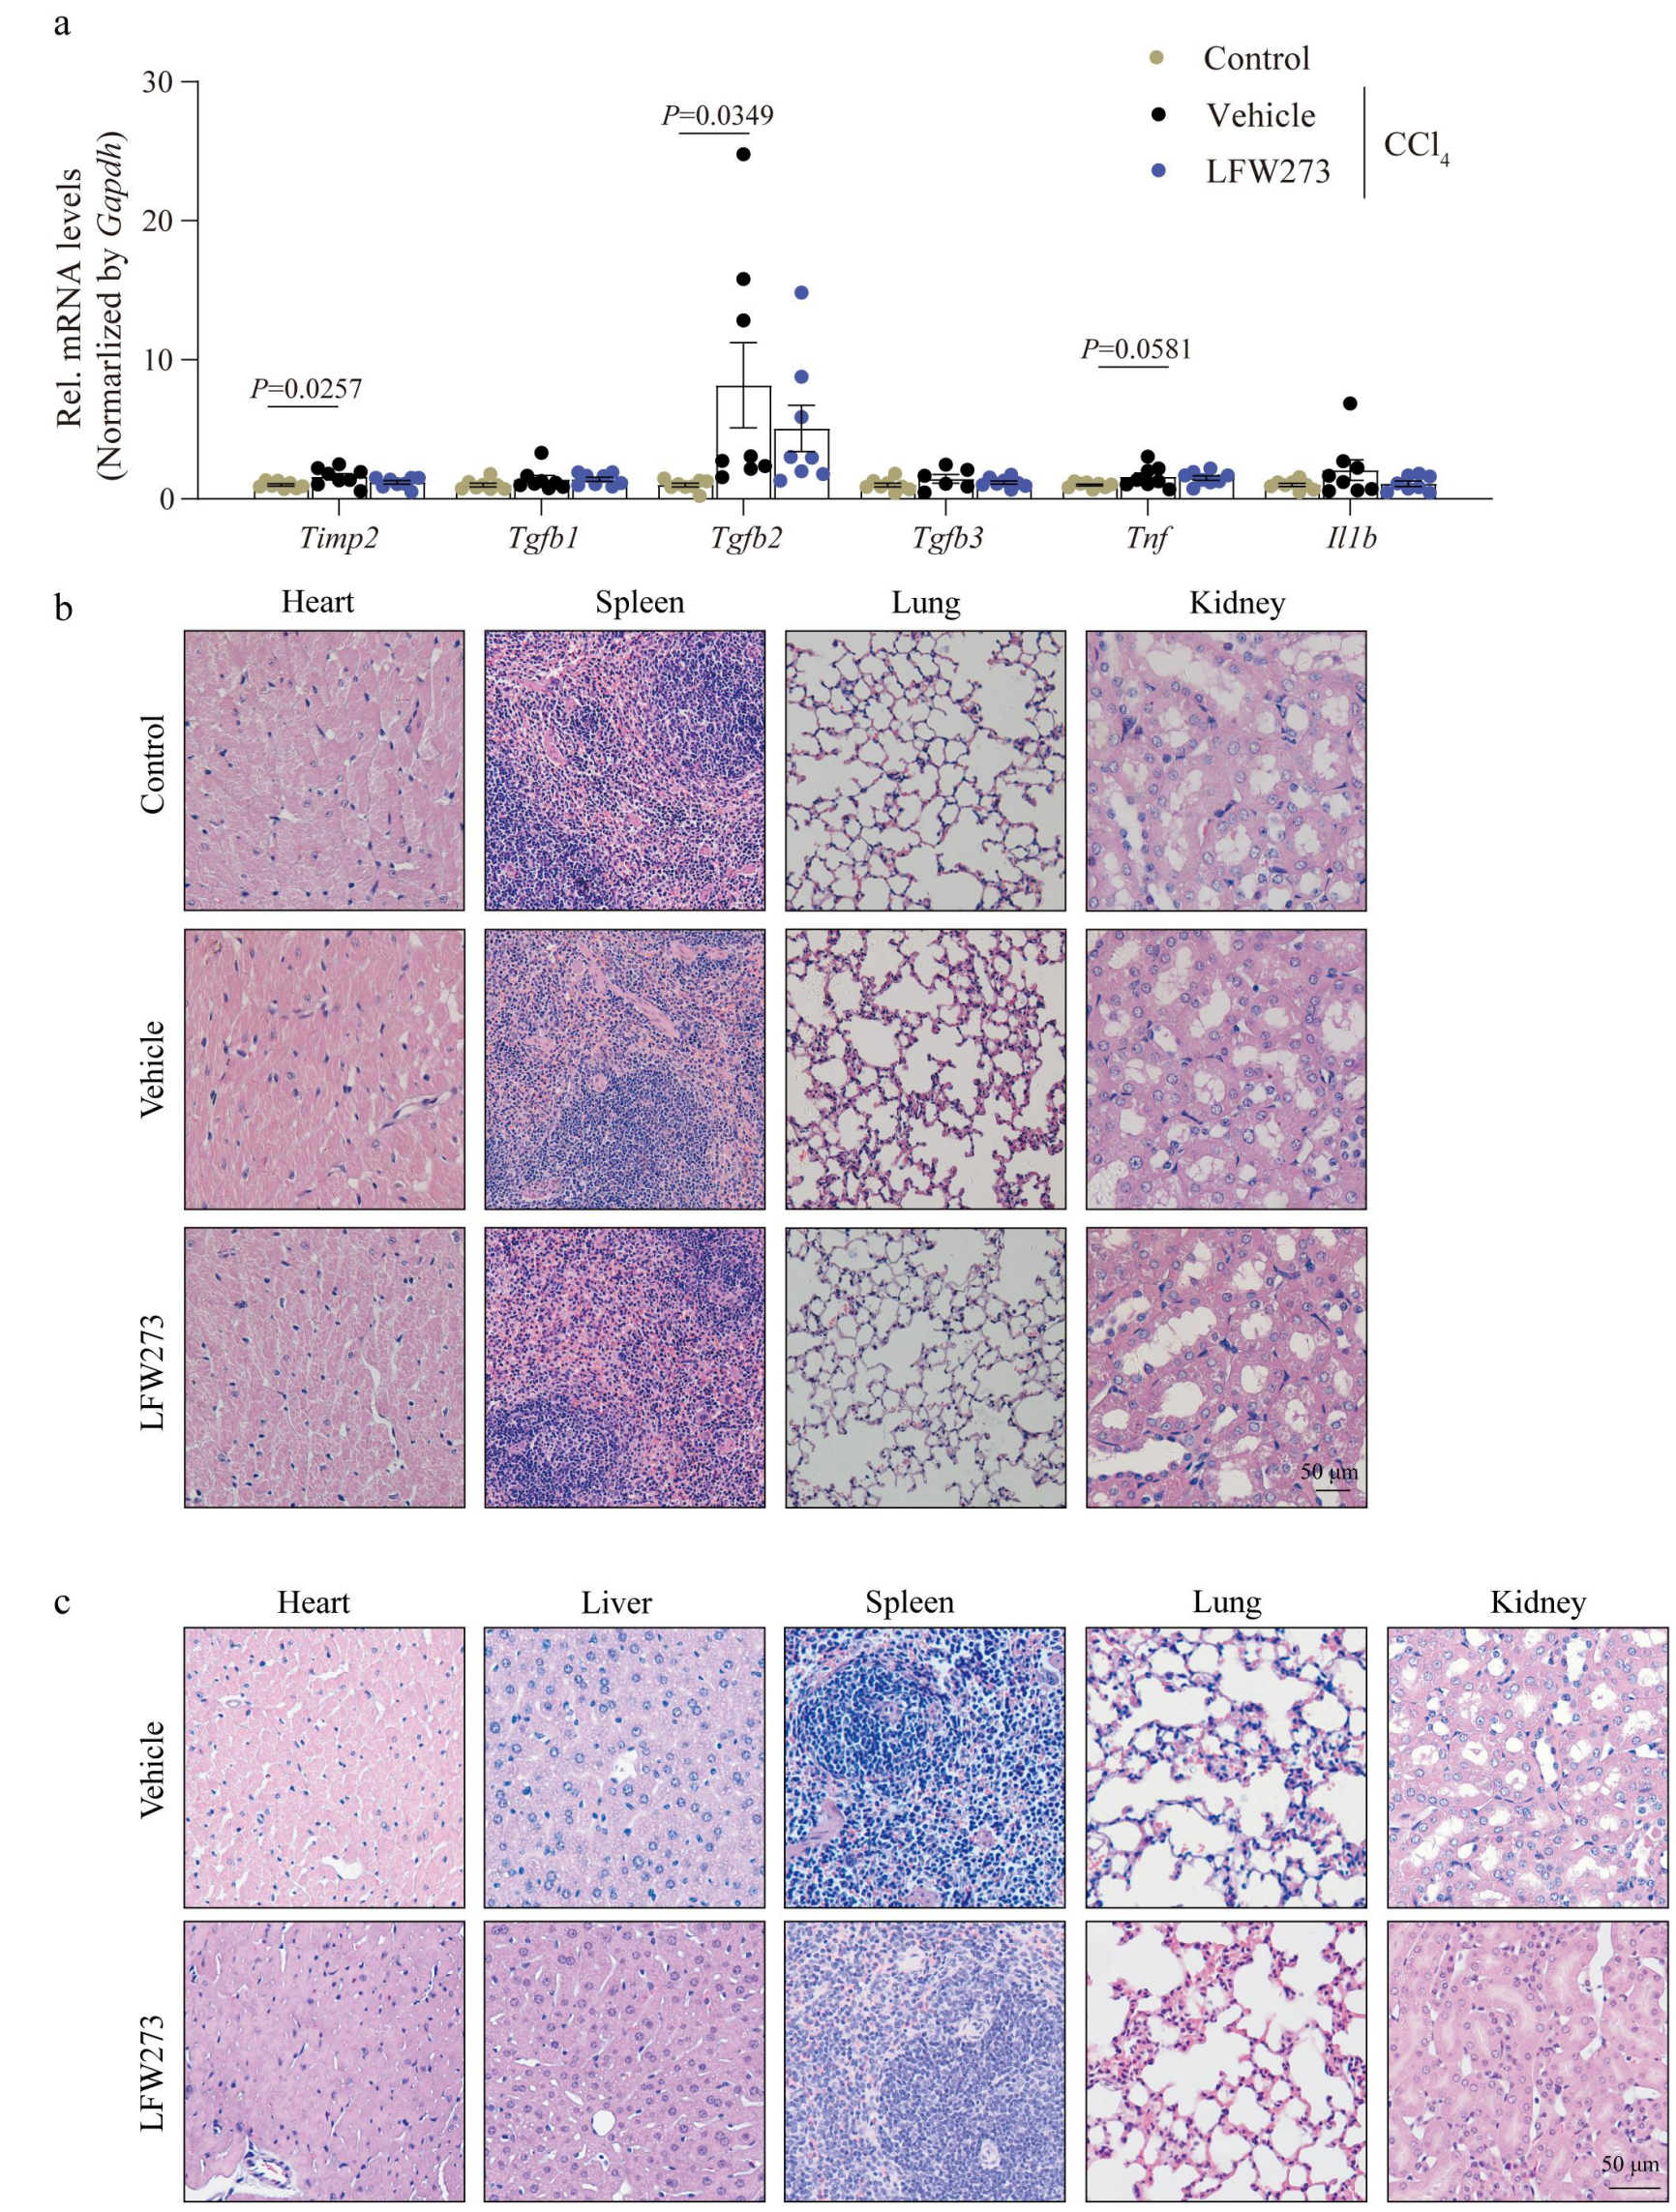

Fig. S5

Supplementary Fig. S5. LFW273 alleviated the development of CCl_4-induced liver fibrosis.

(a) Gene expressions of *Timp2*, *Tgfb1*, *Tgfb2*, *Tgfb3*, *Tnf*, and *Il1b* in control mice and CCl_4-induced fibrotic mice treated with vehicle or LFW273. (b and c) H&E staining images of heart, spleen, lung and kidney in mice treated with LFW273 for 4 weeks (b) or administrated LFW273 at 1g/kg for 7 days (c). Scale bar: 50 μm.
