

Fig. S2. ACT improved lipid accumulation in HIRI livers. (A) Immunohistochemistry staining for ADRP. Scale bar = 100 μ m. (B) Immunofluorescence staining for ADRP. Scale bar = 20 μ m. Statistical significance: *** p < 0.001, compared with control group; ## p < 0.01, ### p < 0.001, compared with the model group (n = 3 for cell experiments, n = 6 for mice experiments).
