

Fig. S5. Crocin II improves HFD-induced insulin resistance and hyperlipidemia in mice, referred to Fig. 4. (A) Food intake and water intake. (B) The area under the curve of GTT and ITT. $n = 6$, n.s., no significance, $**P < 0.01$ v.s. ND + Saline group, $##P < 0.01$ v.s. HFD + Saline group, one-way ANOVA followed by Bonferroni's *posthoc* test. All values are presented as the mean \pm SD.
