

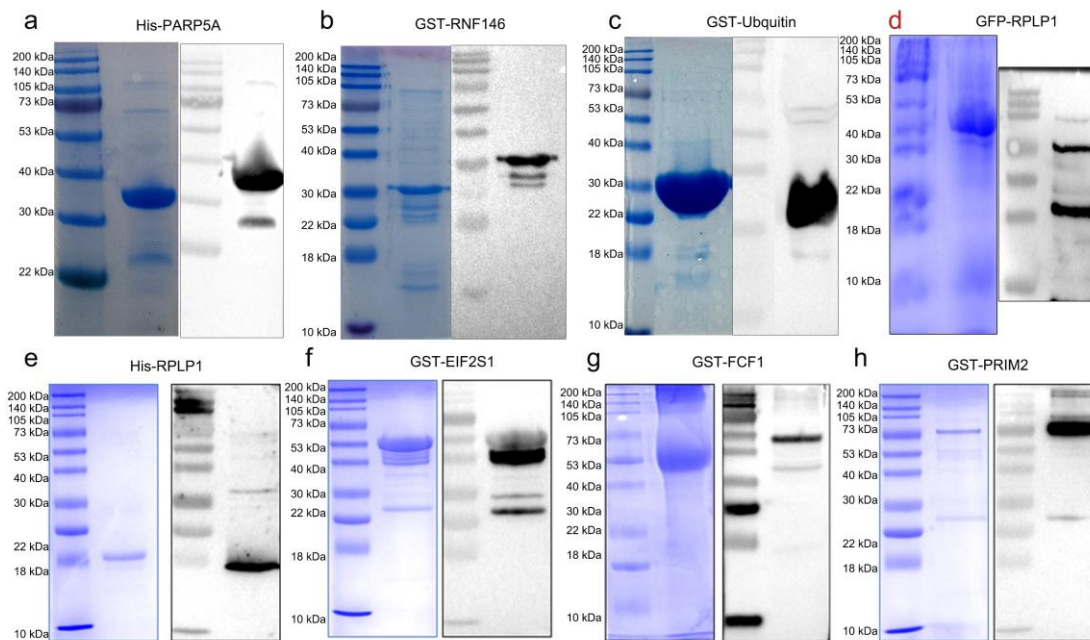

Figure S1. Purification of recombinant proteins. Coomassie-stained SDS-PAGE gels (left) and corresponding immunoblots (right) for purified His-PARP5A (a), GST-RNF146 (b), GST-ubiquitin (c), His-RPLP1 (d), GST-EIF2S1 (e), GST-FCF1 (f), and GST-PRIM2 (g). Molecular weight markers (kDa) are indicated.
