

Supplementary Fig. S2: Effect of plant growth regulators on *in vitro* morphogenetic response (shoot multiplication) in $\frac{1}{2}$ MS + 2 % Sucrose + 0.8 % Agar medium from *in vivo* derived non-dormant corms of *Gloriosa superba* L. (A - D) Culture initiation on 1.5 mg L^{-1} BAP + 10 mg L^{-1} ADS. (D - E) Initiation of shoots on 1.5 mg L^{-1} BAP + 10 mg L^{-1} ADS, (F - I) Multiplication of shoots on 1.5 mg L^{-1} BAP + 10 mg L^{-1} ADS. Scale bar = 2 cm
