

Supplementary Fig. S4: Effect of plant growth regulators on *in vitro* morphogenetic response (shoot multiplication) in $\frac{1}{2}$ MS + 2 % Sucrose + 0.8 % Agar medium from *in vivo* derived non-dormant corms of *Gloriosa superba* L. (A-D) Initiation of non-dormant corms on 1.0 mg L^{-1} KN + 20 mg L^{-1} ADS, (E - G) Initiation of non-dormant corms on 0.5 mg L^{-1} KN + 20 mg L^{-1} ADS, (H) Initiation of non-dormant corms on 1.5 mg L^{-1} KN + 10 mg L^{-1} ADS, (I - J) Multiplication of shoots from non-dormant corms on 1.0 mg L^{-1} KN + 20 mg L^{-1} ADS. Scale bar = 1 cm
