

A

Supplementary Figure 4. Time-resolved expression profiles of representative terpenoid-pathway genes in BM and SXY.

(A) Expression dynamics of DXS at 0 d, 15 d, and 30 d after injury in BM and SXY. (B) Expression dynamics of HMGS at 0 d, 15 d, and 30 d after injury in BM and SXY. (C) Expression dynamics of TPSa1 at 0 d, 15 d, and 30 d after injury in BM and SXY. Points represent biological replicates, and lines represent mean expression levels.
