

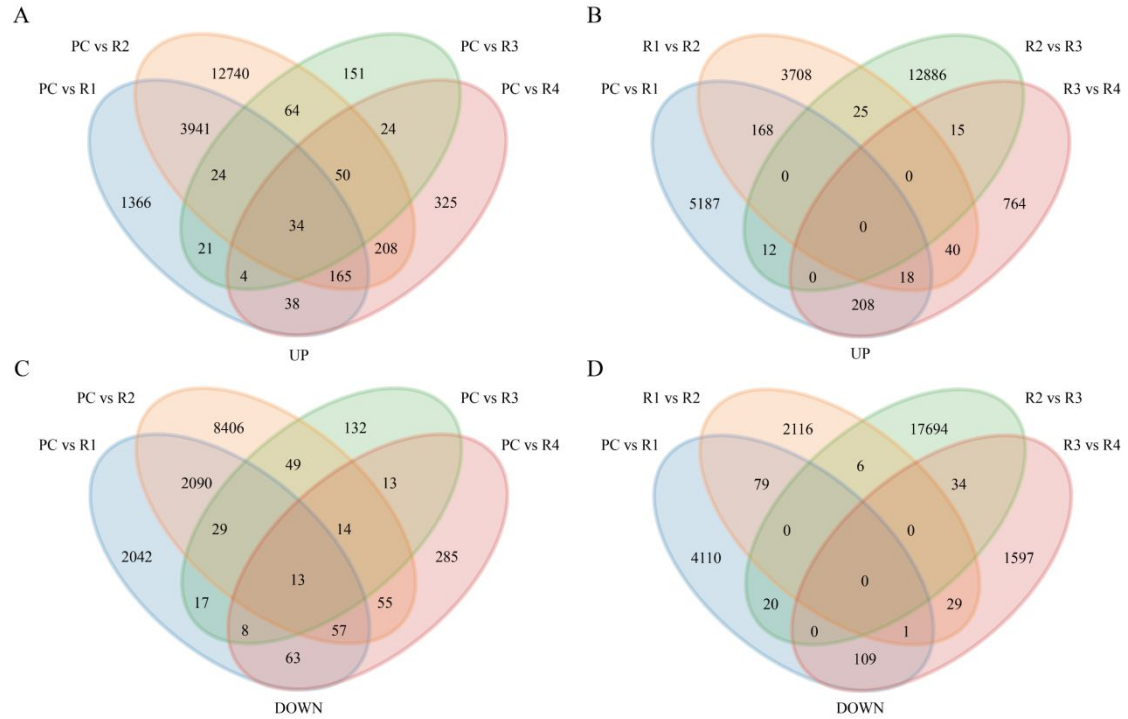

Figure S2. Venn diagram analysis of differentially expressed genes (DEGs). (A, C) Overlaps of up-regulated (A) and down-regulated (C) DEGs between each ratoon year (R1–R4) using plant cane (PC) as the common control. (B, D) Overlaps of up-regulated (B) and down-regulated (D) DEGs between adjacent ratoon stages (e.g., R1 vs. R2). Numbers indicate the count of unique and shared DEGs in each region. UP, up-regulated; DOWN, down-regulated.
