

Supplementary Figure 2. Expression analysis of *SISWEET10a*

Relative expression levels of *SISWEET10a* (10a) in different tissues from roots, stems, young leaves, mature leaves, and flowers, sepals, fruit stalks, mature green (MG) fruits, red ripe (RR) fruits, and seeds. The expression level of root was set to 1. The *ACTIN* was used as internal control. Data are mean values \pm SD of at least three biological replicates.
