

Fig. S2 *Scutellaria baicalensis* Georgi extracts and baicalin affect the aboveground and underground tissue fresh weight of tomato seedlings. (A, C) Fresh weight (FW) of tomato aboveground tissues after *S.baicalensis* extracts and baicalin treatments. (B, D) FW of tomato underground tissues after *S.baicalensis* extracts and baicalin treatments. Results are shown as means \pm SD (n = 6). Values marked with same letter within a sampling date are not significantly different at $P < 0.05$ according to Duncan's new multiple-range test.
