

Fig. S1 RT-qPCR analysis of *CsRVE6* and *CsPin1At* expression in various cucumber organs (root, stem, leaf, petal, sepal, tendrils, lateral branch, apical bud). a. *CsRVE6* relative expression level. b. *CsPin1At* relative expression level. Different letters (a, b, c, d, e) indicate significant differences between groups ($P < 0.05$). The values represent the mean \pm SD (n = 3)
