

Figure S4. Expression analysis of sugar metabolism-related genes after β -Glc Yariv treatment in melon fruit. Melon fruits of the cv. 'BCG' at 20 DAA were sprayed with β -Glc Yariv solution. *TUA* (α -tubulin) was used as reference gene. Water was used as the control. Data represent means of three biological replicates \pm SE. Statistical significance was denoted as * P <0.05 and ** P <0.01 by t-test.
