

Figure S3 Subcellular localization results of ClOr1 protein. Free-GFP is pBWA(V)HS-Osgfp no-load control, and ClOr1-GFP is pBWA(V)HS-Osgfp-ClOr1 experimental group. gfp is the Osgfp protein fluorescence signal, Nucleus marker is the nucleus marker fluorescence signal, and chlorophyll is chloroplast autofluorescence, Bright field is bright field, Merged is superimposed field, and the scale bar is 20 μ m.
