

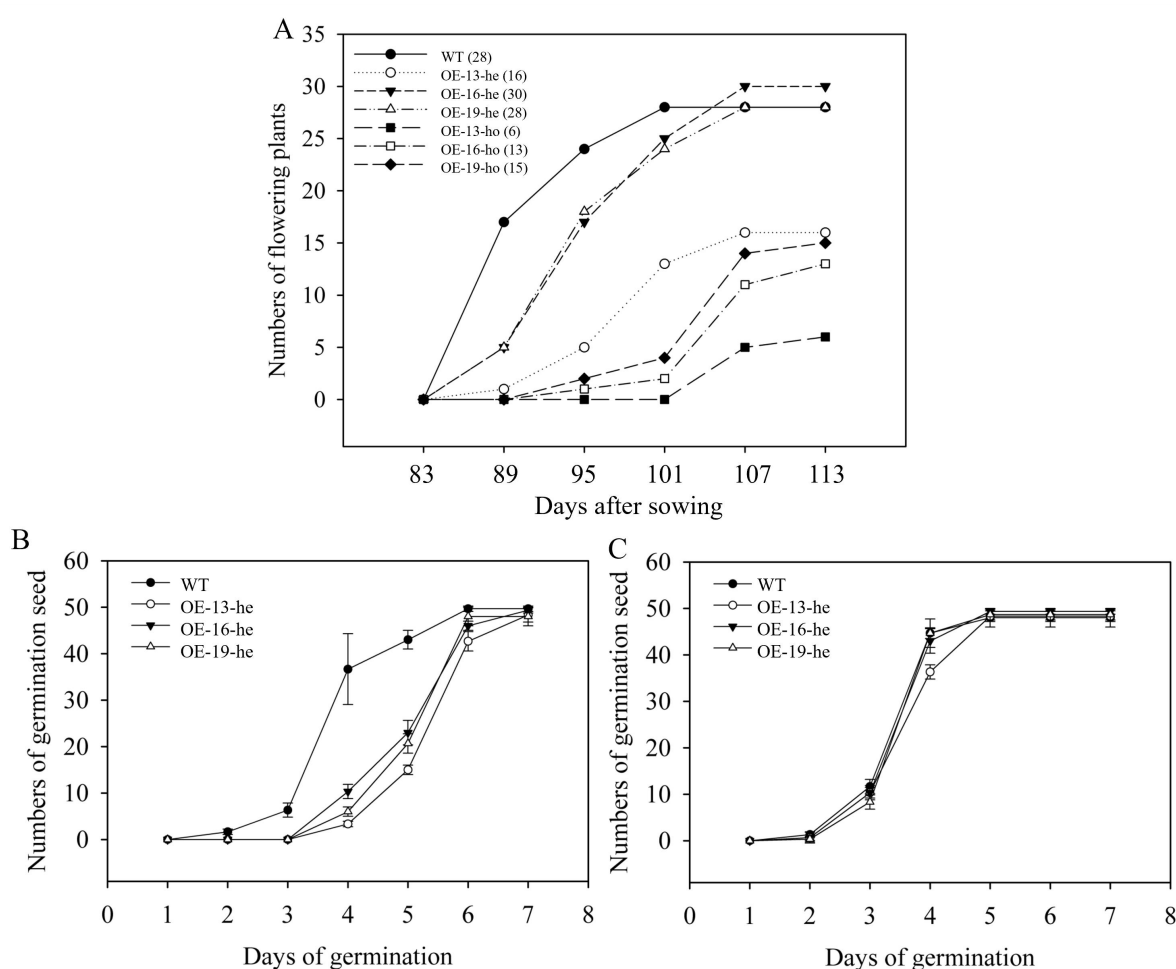

Fig. S1 Flowering time and seed germination in T2 lines with overexpression (OE) of the *SIPsy1* gene in tomato inbred line Ohio 88119 (wild type, WT)

A. Flowering time. The seedlings number WT and different transgenic lines was in parenthesis. he: heterozygote. ho: homozygote. B. Dynamic number of seeds germinated without GA3 treatment. C. Dynamic number of seeds germinated treated with 10 μ M GA3. Numbers in B and C are mean of three biological replications with 50 seeds per replication.
