

Supplementary Table S3. The efficacy of repeated low-level red-light therapy in controlling axial length and cycloplegic spherical equivalent refraction in different treatment compliance groups

Treatment compliance	RLRL group		Efficacy (%)
	Number of participants	Mean ± SD	
Primary outcome			
Change in AL (mm)			
Total	64	-0.052±0.249	114.09
<80%	32	-0.023±0.285	106.22
≥80%	32	-0.080±0.207	121.68
Secondary outcome			
Change in SER(D)			
Total	64	0.162±0.463	122.98
<80%	32	0.082±0.471	111.63
≥80%	32	0.242±0.448	134.33

RLRL = repeated low-level red-light; AL = axial length; D = diopter; SER = spherical equivalent refraction.
