

Supplementary Table S2. One-year changes in UCVA, BCVA, and Fluctuation in IOP in the RLRL and 0.01% atropine groups

	No. (%)		<i>P</i> value
	RLRL group	0.01% atropine group	
Change of UCVA			0.003
≥2 lines worsening	3 (10.00)	11 (47.83)	
±1 line	17 (56.57)	10 (43.48)	
≥2 lines improvement	10 (33.33)	2 (8.69)	
Maintained BCVA of 20/20	64 (100%)	53 (100%)	
Fluctuation of IOP			0.082
≤5 mmHg	50 (78.13)	42 (79.20)	
>5 mmHg	14 (21.87)	11 (20.80)	

UCVA = uncorrected visual acuity; BCVA = best corrected visual acuity; IOP = intra-ocular pressure
P values were calculated using the chi-square test.
