

Supplementary Figure S2. OCTA Layered Blood Flow Analysis in RP Patient Macular Region. (A) Layered OCTA image of patient RP-10: Green lines demarcate the IPL (Inner Plexiform Layer) and OPL (Outer Plexiform Layer); red indicates retinal blood flow, yellow indicates choroidal blood flow. (B) Foveal center (6×6 mm) and whole-retina blood flow map with central (1°) and peripheral (3°) rings. (C) Choroidal blood flow distribution map of the corresponding region.
