

Supple. Fig.4 The verification of transgenic Arabidopsis lines. **A**, The amplification of construct specific fragments of Arabidopsis genomic DNA. Wt, wild type; N4, N7, N10 are representative 35s:CcNST1 lines. **B**, The expression of CcNST1 in Arabidopsis lines. The wild type is not detectable (nd). Different letters (a, b) indicate significant difference by the Student's test $p < 0.05$.
